

OUR MANAGEMENT PHILOSOPHY

AFC Industries' SIMPLE management philosophy is a framework designed to drive operational excellence and foster a customer-focused culture. SIMPLE stands for Streamline, Improve, Measure, Planning, Learning and Execute, representing the core values that guide our decisions and actions. This approach emphasizes providing exceptional service, maintaining transparency and trust, leveraging metrics to drive performance, investing in our people, demonstrating strong leadership, and striving for excellence in everything we do. By following the SIMPLE philosophy, AFC ensures we deliver innovative solutions, build lasting partnerships, and continuously improve to meet the evolving needs of our customers.

S	Streamline We value simplicity, with efficient and effective practices.
I	Improve We value better processes both internally and with our customer partners.
M	Measure We gather data to define and set your goal. You can't improve what you cannot see.
P	Planning Every solid execution begins with a good strategy and the tactical plan to execute on it.
L	Learning We are always open to improvement and eagerly approach new challenges.
E	Execute We do what we say we're going to do, on time and correctly the first time.

“Everything we do supports our primary goal: to make our customers’ lives simpler.”

Kevin Godin, CEO

CUSTOM ENGINEERED COMPONENTS

AFC’s CEC Group delivers custom-manufactured components with a focus on cost savings and high-quality standards. We source from both domestic and global suppliers to provide the best solutions for industries like lawn & garden, appliances, marine, medical equipment, and food & beverage.

Reliable Quality & Compliance
We work with trusted, vetted suppliers to ensure full transparency in materials and manufacturing.

Customers receive:

- AIAG PPAP Certifications
- Material & Plating Certifications

- Dimensional & Mechanical Testing Data
- First Article & Pre-Production Samples

Engineering & R&D Support
Our team helps simplify supply chains, improve efficiency, and cut costs by:

- Solving manufacturing bottlenecks
- Reducing part complexity
- Supporting part consolidation
- Driving VA/VE cost savings
- Ensuring compliance

With AFC, you get smarter sourcing, streamlined production, and reliable quality—all in one place.

Categories:

- Custom metal fabrication
- Powdered metal & metal injection molding
- Plastic/rubber injection molding & extrusion
- Aluminum extrusions
- Pneumatic fittings & components
- Functional hardware
- Wire harnesses & electrical assemblies

Who is AFC Industries?

 We've got the size, scale and focus to drive your supply chain efficiency higher

AFC Industries partners with OEMs and assemblers to simplify and optimize their supply chains. What sets us apart is our commitment to exceptional service—understanding each customer's unique needs and delivering tailored solutions that reduce costs and improve efficiency.

At AFC, we don't just provide products; we build long-term partnerships by ensuring our customers can focus on their goals while we take care of the rest. Reliable, responsive, and service-driven—that's AFC Industries.

Our Key Services and Offerings

- Vendor-Managed Inventory (VMI)
- Custom Kitting
- Light Assembly
- Custom Packaging Solutions
- Private Labeling
- Supply Chain Management
- Cutting Tool Management
- Technical Expertise (VA/VE)

Each of these services is designed to deliver the lowest **Total Cost of Ownership** and support our customers' success.

Where you'll find us in your supply chain process.

 Ask how we can improve your supply chain efficiency while delivering a lower total cost of ownership

We specialize in managing the often-overlooked but critical C-Part items in your supply chain. These include intermediate-value and low-cost, high-mix parts that are challenging to manage but essential for smooth operations.

While C-Parts represent a small portion of total spend, they require significant time and resources to control effectively. AFC thrives in this space, eliminating the hassle and inefficiencies of managing these components, so you don't have to.

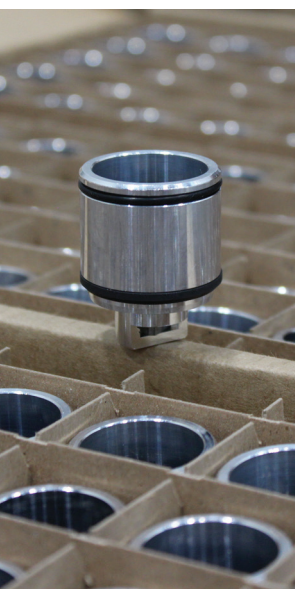

By focusing on B and C items, we reduce waste, ensure consistent availability, and help streamline your supply chain.

With our tailored solutions, we take on the complexity of managing these parts, allowing you to focus on what matters most—driving your business forward. At AFC, we remove the worry and waste from your C-Part inventory management.

GLOBAL REACH + LOCAL SUPPORT

Why you'll love partnering with us.

 We Make Inventory Management Simple. Less Worry, More WOW!

Your Challenges	Our Solutions
Inventory Management Challenges	We handle inventory management entirely, ensuring you always have the right parts when you need them. Our advanced planning tools prevent stockouts and excess inventory.
Supplier Management Complexity	AFC serves as a single point of contact, managing a trusted supplier network to streamline procurement while ensuring consistent quality and reliable lead times.
High Operational Costs	Kitting, custom packaging, and assembly services reduce internal labor and operational costs. Just-in-Time solutions minimize storage needs and improve cash flow.
Limited Flexibility and Scalability	Tailored solutions align with your needs, schedules, and market demands. We adapt quickly to changes, ensuring seamless operations, with a global footprint and systems built to scale with you.
Quality and Consistency Issues	Rigorous quality checks, supplier audits, and continuous process evaluations ensure consistent performance and reliability. We collaborate with you to address challenges proactively, preventing issues before they arise.
